

INVERTER PLASMA

CUT-40-II

FEATURES

- IGBT inverter technology
- Compact size, lightweight, high efficiency and energy saving
- ABS plastic enclosure with excellent insulation performance and corrosion resistance
- Cutting speed is up to 1.8 times faster than oxyfuel cutting
- Suitable for cutting stainless steel, copper, carbon steel and aluminium amongst others
- Simple operation for a smooth cutting surface

SPECIFICATIONS

Input power voltage	: AC230-380V Single phase 50/60Hz
Rate input power capacity	: 4.8KVA
No-load voltage	: 230V
Output current range	: 10-40A
Duty cycle	: 60%
Insulation class	: B
Protection class	: IP23
Welding thickness	: 12mm
